

Master Control Operator
Location: Los Angeles, CA

Job Type: Full Time
Experience: 2 years
Minimum Salary: Not Specified

Travel: No Travel
Education: Some College

Job Description:

Job Title: Master Control Operator
Group: Entertainment
Department: Broadcast Operations

BASIC FUNCTIONS:

Under the direction of the Master Control Supervisor, this position will be responsible for maintaining video and audio functions of Master Control and insuring the integrity of the network origination of up to twenty-four digital channels 24x7.

The ideal candidate should be familiar with the operating functionality of various types of broadcast equipment. He/she will be required to maintain discrepancy reports and troubleshoot technical issues in Master Control, as well as have the ability and composure to perform in an emergency on-air outage situation. In addition, the ability to handle multiple responsibilities is a plus.

POSITION REQUIREMENTS:

1. Perform all playback and monitoring functions for the origination of multiple 24x7 server based satellite broadcast channels
2. Review, edit, monitor and confirm the on-going reliability of the automation play-list
3. Maintain all appropriate "on air" logs and discrepancy reports

JOB SPECIFICATIONS:

The candidate should have at least two years experience in a multi-channel broadcast facility. He/she should be detail oriented, capable of working under pressure and capable of performing and tracking multiple tasks during each shift. He/she must have a flexible attitude and be capable of taking direction from the Supervisor, Master Control. He/she must also be able to work flexible hours.

The candidate should have knowledge of the following areas:

- Broadcast automation systems;
- Fiber/satellite operations;
- NTSC and PAL video/audio standards;
- Video servers (e.g. Pinnacle, Omneon);
- Various router functions
